Education and Training

Master's Degree in Cybersecurity, University of Padua — 02/09/2023 – Present

- Expected graduation between December 2025 and March 2026.
- **GPA**: 29/30.
- **Thesis**: *LLM-Based Triaging of Vulnerabilities in Android Native Libraries*
- **Skills acquired**: Foundations of cybersecurity; Ethical hacking; Mobile security; Web development (Java Servlet) and containerisation with Docker; Front-end and back-end development with API integration; fundamentals of Machine Learning and Deep Learning.

CyberChallenge.IT, University of Padua — 29/02/2024 – 29/05/2024
Certificate

- National cybersecurity training programme for university and high school students organised by the Cybersecurity National Lab of CINI. CyberChallenge.IT
- **Skills acquired**: Capture The Flag (CTF) problem-solving in Cryptography, Hardware Security, Network Security, Software Security, and Web Security.

Bachelor's Degree in Computer Engineering, University of Padua — 27/09/2020 – 21/07/2023
Certificate

- **Final grade**: 108/110.
- **Thesis**: *Development of a GUI for controlling a walking-assistive exoskeleton: User profiling and data logging*. Thesis, Project
- **Skills acquired**: Team project collaboration; use of Git and GitHub; development in Java, C/C++, and Python; Android app design; Qt framework for GUIs; Robot Operating System (ROS); mathematical and physical competencies.

High School Diploma in Computer Science, ITT "G. Chilesotti", Thiene, Italy — 15/09/2015 – 01/07/2020

- **Final project**: Video streaming platform with a film catalogue including ratings, cast, genre, trailer player, and a ticketing system for client requests and support management. Online demo.
- **Skills acquired**: CLI/GUI apps in C#; development in Java and C; multithreading programming; database modelling and querying; web technologies (HTML, CSS, JS); PHP.

Professional Experience

Servintek S.r.l., Cyber Security Intern. servintek.com — Thiene, Italy
24/03/2025 – 04/07/2025

- Internship in the Cybersecurity area.
- Conducted analysis, implementation, and internal documentation on Citrix NetScaler, a Web Application Firewall (WAF).
- **Skills acquired**: Use of Citrix NetScaler (ADC); client interaction; liaison with vendor technical support; use of Proxmox VE.

Mirve, Programmer. mirve.it. Thiene, Italy
03/06/2019 – 05/07/2020

- Work-based learning programme (PCTO).
- Developed several applications in C#.

Some of my Academic Projects

Thesis Project for Bachelor's Degree GUI_robotic_exoskeleton

- Two-person team project to build a GUI for the Alice exoskeleton, previously controllable only via CLI.
- **My contributions**: Implemented multi-user management and logging for rehabilitation use, and added automatic parameter configuration based on height, femur length, and weight.
- **Tools Used**: ROS, Qt, C++

Web Application: LupusInFabula LupusInFabula

- A six person project for *Web Application* course in the Master's degree program.
- The goal of this project was to help the game master of *Lupus in Fabula* manage the game. *Lupus in Fabula* is a social-deduction party game (akin to Werewolf) with multiple roles. The application supports multi-player sessions and diverse roles, each with its own abilities and win conditions.
- **My contributions**: I organised the workstream and set up the base infrastructure—Docker containers orchestrated with Docker Compose (Tomcat and PostgreSQL), database initialisation, Maven configuration, and the first Java Servlet scaffold. I defined the backend–frontend architecture and designed the REST API. I implemented servlets for user authentication (login, signup, logout) with their DAOs. I also designed the app's UI/UX (light/dark theme, responsive layout) and graphic the presentation
- **Tools Used**: Java Servlet, Docker, Maven, PostgreSQL, APIs, HTML, CSS, JS

Android Application with the use CameraX APIs: CameraPaw CameraAPIs

- Project group of three persons, developed for an Bachelor's degree course *Programmazione di sistemi embedded*. The project consisted of developed a full-featured camera app: front/rear with zoom-based wide-ultra-wide switching, flash/torch, tap-to-focus, self-timer, QR scanning with context actions, and configurable advanced modes (HDR, Bokeh, Night) where supported.
- **My contributions**: Implemented core camera feature, on-screen preview, shutter control, and pinch-to-zoom with automatic lens switching and settings for aspect ratio and video FPS. Use of advanced modes (HDR, Bokeh, Night). I also designed and refined the app's UI/UX, including a custom pop-up in case of permission denial.
- **Tools Used**: Android Studio, kotlin, Android SDK

Languages

Italian: Native language

English: B2. Certificates: Reading and Listening, Speaking

Technologies

Programming languages: C, C++, C#, Java, Python, JavaScript, PHP, SQL, Kotlin (Android).

Web (markup & styling): HTML5, CSS3.

Frameworks & Platforms: ROS, Android SDK.

Technologies & Tools: Object-oriented programming, multithreading, Docker, Docker Compose, Git, REST APIs.

Databases: MySQL.

Operating Systems: Microsoft Windows, Linux (Ubuntu).

Last update: November 20, 2025
